COLORFUL® THREAD SPECIFICATIONS

Colorful® trilobal polyester thread is meticulously engineered to ensure superior quality and visually appealing embroidery. It proudly boasts both ISO9001 and OEKO-TEX certification.

Colorful® machine embroidery thread ensures greater production efficiency.

HIGH TENACITY

Made from continuous filament fibre for strength and durability designed to withstand tough conditions.

LOW ELONGATION

Stretch control characteristics yield excellent sewability with tight, firm stitches.

LOW FRICTION

The even stitch balance allows thread to run smoothly through thread guides and tension controls.

VIBRANT HIGH LUSTRE

Vibrant high lustre colours with satin finish and colorfast properties.

DISCLAIMER

While Colorful® Thread is manufactured to the highest possible standards, the manufacturer cannot be held responsible for any damage arising during washing, drying and ironing as these processes are beyond the control of the thread manufacturer. It is recommended that a sample test is performed in order to ascertain correct procedures.
